

The Guide to Recover the Password for MS Access Document

Tips: Here is a concise user guide for you to quickly get familiar with [Access Password Recovery 5.0](#). Any inquiries about using the program please refer to the "Help" document integrated in the program.

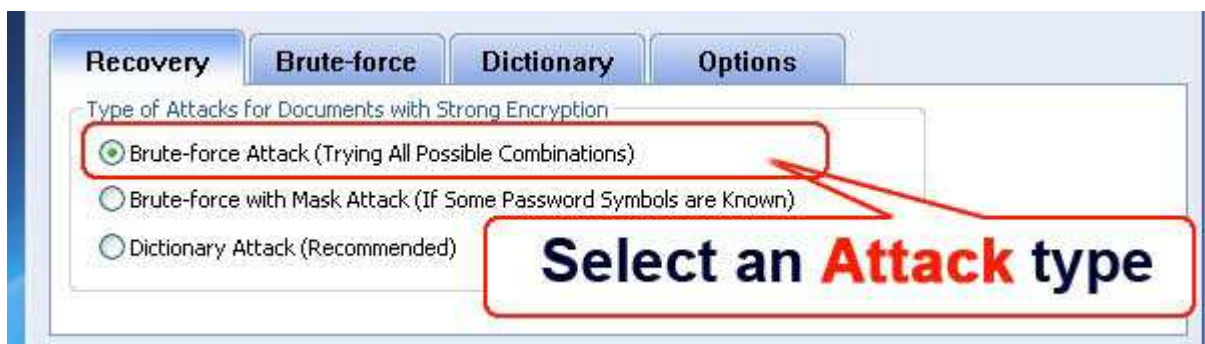

Step1: Click "Open" to import the target .mdb file to the program.

Select your file in the "Open File" window and click "Open".

Step 2: On the "Recovery" tab, select "Brute-force Attack (Trying All Possible Combinations)".

Step 3: Click "Start" button in the Menu to initiate the program.

Step 4: Some time later, a message box pops up to you, showing the User Password expected. Click "Remove All Passwords from the File" to remove all the restrictions placed on the Access file. Click "OK".
