Step6: Reboot computer and login to the locked PC without password.

No matter how complicated or how long your Windows 7 password is, this application—Windows Password Recovery Professional will instantly hack it within one minute! Only one minute later, you can regain access to your PC without limitation!

<u>Change Windows 7 password</u> with freeware—Ophcrack.

Ophcrack is an open source and free program that bypass Windows passwords by using LM hashes through rainbow tables. The Ophcrack Windows password reset is by far the fastest free Windows 7 password hacker tool available.

While compared with other professional Windows password recovery software, of course, Ophcrack, as a freeware, has some limitations. In the test on my Win 7 PC, Ophcrack can recover at most a 10-character password to my administrator account. Well, for the purpose of safety, I do recommend you to use a professional Windows password recovery tool.
